Job Summary:

We are seeking a highly skilled and detail-oriented Functional and Non-functional Test Engineer with Telecom Domain is must to join our team. As a Test Engineer, you will be responsible for the execution, analysis, troubleshooting, and triaging of issues in PTT (Push-to-Talk) domain

microservice applications. You will collaborate closely with cross-functional teams including developers, product managers, and system analysts to ensure the quality and reliability of our PTT applications.

Responsibilities

- Execute functional and non-functional tests on PTT domain applications to identify defects, bugs, and performance issues.
- Create, review, and execute test cases and test scripts to ensure comprehensive test coverage.
- Analyze test results and provide insightful reports to stakeholders, including recommendations for improvements and bug fixes.
- Troubleshoot issues and work closely with the development team to resolve any identified defects or software anomalies.
- Continuously improve test processes and methodologies to optimize efficiency and effectiveness.
- Participate in daily stand-ups, sprint planning, and retrospective meetings to provide input on testing strategies and contribute to the overall development process.
- Maintain documentation related to test plans, test cases, and test results for future reference.
- Stay up-to-date with emerging technologies, industry trends, and best practices in testing methodologies.

Requirements:

Mandatory

- Proven experience in functional and non-functional testing of PTT domain applications.
- Strong knowledge of software testing methodologies, tools, and frameworks.
- Solid understanding of test analysis, test execution, and defect tracking processes.
- Familiarity with troubleshooting techniques and ability to effectively triage issues.
- Proficient in test case creation, execution, and reporting using test management tools.
- Excellent analytical and problem-solving skills with attention to detail.
- Strong communication and collaboration abilities to work effectively in cross-functional teams.
- Self-motivated and able to work independently with minimal supervision.
- Experience in Agile/Scrum development methodologies is a plus.
- Knowledge of telecommunications or PTT domain is highly desirable.

Qualifications

- Bachelor's degree in Computer Science, Engineering, or a related field.
- At least 5+ years of experience.
