## **Job Summary:**

We are looking for a skilled **OpenShift Administrator** to join our dynamic team. As an OpenShift Admin, you will be responsible for managing, deploying, and optimizing OpenShift clusters across multiple environments.

## **Responsibilities:**

- Install, configure, and manage OpenShift clusters on [cloud/on-premises environments].
- Monitor and maintain the health of the OpenShift platform and associated infrastructure.
- Perform upgrades, patches, and maintenance to ensure optimal system performance.
- Automate routine tasks using Ansible, Jenkins, or other CI/CD tools.
- Troubleshoot and resolve issues related to OpenShift deployments, pods, and network connectivity.
- Collaborate with development teams to ensure seamless deployment of applications in containers.
- Ensure security best practices are implemented across the cluster.
- Maintain proper documentation of cluster configurations and procedures.

## **Basic Qualifications:**

- Proven experience as an OpenShift Administrator or similar role.
- Strong knowledge of container orchestration using OpenShift and Kubernetes.
- Experience with Linux system administration (RHEL/CentOS).
- Proficiency with CI/CD tools such as Jenkins, Git, and Ansible.
- Hands-on experience with cloud platforms (AWS, Azure, or GCP) is a plus.
- Understanding of network configurations, firewalls, and security policies.
- Strong problem-solving skills and ability to work in a fast-paced environment.
- Relevant certifications (e.g., Red Hat OpenShift Certification) are a bonus.
