Job Summary: LAMP (Linux, Apache, MySQL, PHP) Developer

As a LAMP (Linux, Apache, MySQL, PHP) Developer, you will be responsible for developing and maintaining web applications using the LAMP stack. You will work with a team of developers and collaborate with other departments to ensure the successful execution of projects.

Responsibilities

- Develop and maintain web applications using the LAMP stack.
- Write clean, efficient, and well-documented code.
- Collaborate with designers, project managers, and other developers to ensure the successful delivery of projects.
- Troubleshoot and debug issues that arise during development, testing, and production.
- Stay up-to-date with the latest web development trends and technologies.
- Mentor junior developers and provide technical guidance.
- Participate in code reviews and contribute to the development of best practices.
- Work with stakeholders to understand project requirements and provide technical input and recommendations.

Requirements:

- Bachelor's degree in computer science, software engineering, or a related field.
- At least 4-5 years of experience in web development using the LAMP stack. ●

Proficiency in PHP, MySQL, HTML, CSS, and JavaScript.

- Experience with PHP frameworks such as Laravel, Symfony, or CodeIgniter.
- Knowledge of Linux server administration and Apache web server configuration.
- Experience with version control systems such as Git.
- Strong problem-solving skills and the ability to debug issues quickly.
- Excellent written and verbal communication skills.
- Ability to work independently and as part of a team.
- Ability to manage multiple projects and deadlines.

Qualifications:

- Master's degree in computer science, software engineering, or a related field. ●
- Experience with front-end frameworks such as Angular or React. ●
- Knowledge of mobile application development using hybrid frameworks such as Ionic or React Native.
- Familiarity with cloud-based development environments such as AWS or Azure.
- Experience with automated testing frameworks such as PHPUnit or Selenium.
