## About the Role:

We are looking for a skilled and detail-oriented Software Engineer with 3–5 years of experience to join our development and testing team. The ideal candidate should have a strong foundation in **Node.js** for backend development, and hands-on expertise in **JUnit** and **Selenium (Java)** for automation testing. You will work closely with cross-functional teams to build, test, and deliver high-quality software solutions.

---

### Key Responsibilities:

- Develop and maintain backend services and APIs using **Node.js**.
  - Write unit tests using **JUnit** to ensure code quality and reliability.
  - Design and implement automated test scripts using **Java Selenium**.
  - Collaborate with developers, QA engineers, and product teams to define and validate requirements.
  - Participate in code reviews and adhere to best practices in software development and testing.
  - Debug, troubleshoot, and resolve issues across the application stack.
  - Contribute to continuous integration and continuous delivery (CI/CD) processes.
- 

### Required Skills & Qualifications:

- 3–5 years of professional experience in software development and test automation.
- Strong programming experience with **Node.js**.
- Hands-on experience in writing **unit tests using JUnit**.
- Proven expertise in **automated testing using Selenium with Java**.
- Familiarity with Git, Jenkins, or other version control and CI tools.
- Good understanding of REST APIs, JSON, and HTTP protocols.
- Strong analytical and problem-solving skills.

- Excellent communication and collaboration abilities.

---

**Nice to Have:**

- Experience with test frameworks like Mocha, Chai, or Jest (for Node.js).
- Familiarity with performance testing tools.
- Exposure to Agile/Scrum methodologies.
