About the Role:

We are seeking a skilled **Backend .NET Developer** with strong proficiency in **C#** and the **.NET ecosystem** to design, develop, and maintain high-performance, scalable backend services and APIs. This role is focused on backend development

Key Responsibilities:

- Participate in the planning and analysis for each release
- Involve in the design aspects as it relates to application development/enhancements and future stability/sustainability of the application
- Responsible for supporting the team (business analysts, quality assurance analysts, project manager, other developer, etc.) as it relates to application development changes and integration with other IT partner deliverables
- Engaging in the application development for releases to provide enhanced capabilities and functionality to the application
- Dealing with post release support, incident ticket resolution, and ad-hoc business requests • Participate in the daily standup and provide status updates, contribute to team meetings • Provide and recommend innovative solutions to complex issues
- Develop proof-of-concept prototypes in support of future product concepts

Required Skills:

- 3-7 years of extensive comprehension and hands on experience in developing and supporting enterprise applications
- Full stack development experience required (in Microsoft technologies)
- NET MVC / .NET Core Services / any JS UI Framework SQL Server
- Using and configuring Dev-Ops tools such as Jenkins, SVN, GIT etc. – Preferred • Knowledge on IOT – Preferred
- Preferred having worked in JS Frameworks such as Angular / React / Vue with .NET • Worked in agile development methodologies
- A good understanding of the Applications Lifecycle Management (ALM), with full lifecycle experience, from design through to development, testing and deployment
- A good understanding over extreme programming/practices such as Continuous Integration, Continuous Deployment, Pair programming, Test Drive Development
- Experience with both non-Agile and Agile processes
- Experience with common enterprise security protocols
- Have excellent interpersonal, verbal and written communication skills
- Should be from Telecom Background.

Good to Have:

- Good to have Microsoft Azure Experience
- Good to have Business Intelligence and Reporting skills (SSAS, SSIS, SSRS)
- Knowledge of SharePoint and Microsoft big data tools such as Stream Analytics and Machine Learning

Education:

- Bachelor's degree in Computer Science or related field.
