Job Summary

We are looking for a highly experienced **Project Manager / Delivery Manager** to lead the successful delivery of **Data & Analytics (DnA)** initiatives across complex enterprise environments. The ideal candidate will have over 15 years of hands-on experience managing large-scale data projects, including **fixed-price engagements**, with the ability to lead **large delivery teams (30+ members)**, ensure quality execution, and drive client satisfaction. Experience in **pre-sales**, stakeholder management, and a strong understanding of **data technologies** are essential. Preference will be

given to candidates with domain experience in **Financial Services** and **Manufacturing**.

Key Responsibilities:

- Own end-to-end **project and program delivery** for data and analytics initiatives.
- Successfully manage **fixed-price and time-bound** delivery models with strong commercial awareness.
- Lead cross-functional teams of 30+ professionals including data engineers, analysts, and architects.
- Collaborate with client stakeholders to define project scope, goals, timelines, and deliverables.
- Monitor and manage project budgets, schedules, risks, and quality standards.
- Participate in **pre-sales** efforts, including solutioning, estimation, proposals, and presentations.
- Drive continuous improvement in delivery practices, tools, and methodologies.
- Ensure adherence to governance frameworks and compliance with data security standards.
- Coordinate with technical leads to ensure alignment between project objectives and architectural solutions.
- Provide strategic input into account growth and customer engagement.

Required Skills & Qualifications:

- 15+ years of experience in **project/delivery management** within **data & analytics** programs.
- Proven track record in managing **fixed-price projects** from inception to go-live.
- Hands-on experience leading **large delivery teams (30+ members)** across geographies.
- Exposure to **pre-sales** functions including RFP/RFI response, client discussions, and solutioning.
- Familiarity with **ETL tools** (e.g., Informatica, Talend, SSIS) and **BI tools** (e.g., Power BI, Tableau, Qlik).
- Strong understanding of data management, data governance, and data warehousing concepts.
- Certified **PMP** and/or **Scrum Master**.
- **TOGAF certification** is an added advantage.
- Domain experience in **Financial Services** and/or **Manufacturing** is highly preferred.
