If you're as passionate about your future as we are, join our team.

iSteer is currently seeking a TIBCO Solution Architect for our Systems Integration practice in Canada delivery center.

Responsibilities

- 10+ yrs. expertise in Enterprise Integration Architecture using industry standard integration tools with strong experience on TIBCO Suite of products
- Clearly documented hands-on experience implementing such Integration systems in large-scale initiatives
- In-depth understanding of enterprise integration design patterns, security best practices, communication protocols/techniques and how they align with common business strategies
- Create and maintain the ESB/middleware platform strategies and roadmaps, in partnership with other IT leaders
- Ability to decompose a highly customized landscape, analyze, design, and oversee actual development of such Integration systems. On/off shore development coordination a plus
- Strong communication skills to effectively communicate with and make strategic recommendations to senior level management as well as all levels of internal/external service partners.
- Should be able to provide guidance on how existing investments in Tibco platform can be leveraged towards the business vision
- Should be able to guide to create Prescriptive and Predictive insights using the data being exchanged between systems
- Provide technology architectural assessments, strategies, and roadmaps for one or more technology domains
- Utilize analytical, process, and/or technical skills to meet project objectives and deliverables that are self-directed and within project scope
- Adhering to the Information Security Management System guidelines & policies as set by iSteer

Qualifications

- Proven track record of successfully delivering API/SOA/Middleware integration projects
- Development experience using TIBCO (BusinessWorks, EMS, Web Services, SOAP/HTTPS, Business Connect, Hawk), SOA and MDM and other TIBCO suite of products
- Solid experience in managing and monitoring TIBCO using tools such as TIBCO Administrator, HAWK and API Management / Mashery
- Expertise in Java, JMS, SOAP, REST, JSON, SQL, XML technologies, GitHub, Jenkins and Unix/Linux shell scripts

- Experience with full project life cycle, requirement analysis, design, development, test, and support
- Hands on experience in large-scale SOA design, development, and deployment
- Experience with API management technology
- Experience with common enterprise security protocols
- Good knowledge and understanding of the Information Security Management system
- Have excellent interpersonal, verbal and written communication skills with leadership capability

Preferred Skills and Education:

- Bachelor's degree in Computer Science or related field
- Certification in TIBCO
