Job Overview:

We are seeking a Lead Boomi Developer with 7+ years of experience in designing, implementing, and optimizing integration solutions using the Dell Boomi platform. This role requires a deep understanding of integration architecture and expertise in managing complex integration projects. The ideal candidate will lead teams, mentor junior consultants, and work closely with clients to deliver scalable and effective integration solutions.

Key Responsibilities:

❖ Lead Integration Projects: Manage end-to-end Boomi integration projects, from design to deployment, ensuring alignment with client requirements and delivering successful results.

❖ Solution Design: Architect secure, scalable, and efficient integration solutions using the Dell Boomi platform.

❖ Technical Expertise: Provide hands-on support in Boomi development, troubleshooting, and optimization, acting as the primary technical expert for all Boomi-related tasks.

❖ Mentorship: Guide and mentor junior consultants and development teams, ensuring adherence to best practices.

❖ Client Collaboration: Work closely with business analysts, project managers, and client stakeholders to gather requirements and ensure solutions meet business objectives.

❖ Process Optimization: Continuously monitor, test, and optimize existing integration processes to ensure high performance and data integrity.

❖ Documentation: Maintain comprehensive technical documentation for integration solutions, processes, and troubleshooting procedures.

❖ Ensure Quality: Promote and enforce best practices for coding, testing, deployment, and troubleshooting to maintain high-quality deliverables.

Required Qualifications:

❖ Experience: 10+ years of hands-on experience in integration development, with at least 7+ years focusing on Dell Boomi.

❖ Technical Expertise:

  ➢ Strong knowledge of Dell Boomi Integration, including process design, connectors, API management, and cloud integrations.

  ➢ Proficiency in REST, SOAP, JSON, and XML for API and web services development.

  ➢ In-depth experience with ETL processes and data transformations.

  ➢ Familiarity with cloud technologies (AWS, Azure, GCP) and on-premise systems.

  ➢ Strong database knowledge (SQL, NoSQL, etc.).

❖ Project Management: Proven ability to manage complex projects, balancing both technical delivery and stakeholder communication.

❖ Communication Skills: Strong verbal and written communication skills, with the ability to convey complex technical concepts to non-technical stakeholders.

❖ Certifications: Dell Boomi certifications preferred (e.g., Boomi Professional Developer, Boomi Architect).
