Apigee Administrator

Role Summary

We are looking for an Apigee Administrator to maintain the daily operational health, access governance, and runtime stability of our staging and production API gateway zones.

Key Responsibilities

- Manage role-based access controls (RBAC), user permissions, and developer portal community onboarding.
- Monitor daily gateway logs, performance metrics, and quota limits to preemptively isolate errors and bottlenecks.

- Manage the deployment and configuration promotion of API proxy bundles through non-production environments up to production.
- Assist the senior administration team in resolving infrastructure alerts, system performance drops, and certificate renewals.
- Maintain updated configuration playbooks, environment runbooks, and developer portal documentation.

Qualifications & Requirements

- **Experience:** 3+ years in middleware, ESB, or gateway administration (with at least 1.5+ years explicitly focused on Apigee platforms).
- **Skills:** Practical knowledge of API proxy traffic policies, log parsing, curl utilities, and common monitoring dashboards.
- **Frameworks:** Comfortable working within structured ITIL frameworks handling incident management and standard change control processes.
