- Excellent leadership and an outstanding network of individuals
- On-going regular training Pick up certifications sponsored by iSteer.
- Know more about us and follow us @ <https://isteer.com/>.

Junior Apigee Developer + Admin:

Role Summary

This hybrid role blends API proxy development with lightweight environment support. You will build out core proxy behaviors on Apigee while assisting with pipeline deployments and system verification.

Key Responsibilities

- Develop and configure Apigee proxies, utilizing standard out-of-the-box policies for security, mediation, and traffic management.
- Write custom scripting policies (JavaScript, Node.js, or Java) within Apigee to execute complex transformations, target routing, or UUID generation logic.

- Implement rigorous payload validation rules using JSON Schema and XML/XSD verification at the gateway layer.
- Conduct thorough code-level unit testing and actively support QA and business teams during integrated End-to-End and UAT cycles.
- Assist with environment syncs, minor proxy package promotions, and developer portal documentation upkeep.

Qualifications & Requirements

- **Experience:** 2–4 years of integration development experience, with a minimum of 1+ years actively building and deploying proxies on Google Apigee.
- **Development Skills:** Good programming baseline in JavaScript or Java to write custom extension policies inside Apigee proxies.
- **Core Concepts:** Solid grasp of REST and SOAP architectures, HTTP protocol details, payload parsing, and standard security handshakes.
