Senior Apigee Administrator

Role Summary

As the Senior Apigee Administrator, you will be the primary custodian of the platform's infrastructure health, environment stability, and global runtime policies across all enterprise environments.

Key Responsibilities

- Own platform administration, environment provisioning, and multi-organization topology management across all staging and production instances.
- Configure runtime routing rules, virtual hosts, custom TLS keystores/truststores, and load-balancing target servers inside Apigee.

- Enforce edge threat-protection measures, including JSON/XML threat protection, regular expression injection defense, and IP reputation filtering.
- Build out and optimize automated CI/CD pipelines for safe proxy bundle deployment, configuration promotion, and automated testing.
- Integrate Apigee operational logs and system health metrics with enterprise monitoring tools using OpenTelemetry standards.

Qualifications & Requirements

- **Experience:** 6+ years in system/middleware administration, with 4+ years of dedicated, advanced platform administration on Google Apigee.
- **Credentials:** Google Cloud Certified Professional Apigee API Engineer or Administrator status is a massive plus.
- **Skills:** Strong command over Linux environments, Shell scripting, Python, Infrastructure as Code (Terraform), and enterprise-grade security protocols.
