- Competitive salary + benefits
- We value work-life balance and encourage taking vacations
- Excellent leadership and an outstanding network of individuals
- On-going regular training Pick up certifications sponsored by iSteer.
- Know more about us and follow us @ <https://isteer.com/>.

Integration & API Architect

Role Summary

We are seeking a visionary Integration & API Architect to own the target-state design and technical migration roadmap from TIBCO API Exchange/BW to Google Apigee. You will establish the patterns, security frameworks, and governance models for our enterprise API footprint.

Key Responsibilities

- Define the enterprise-grade API architecture, deployment topologies, and transformation patterns from TIBCO to Apigee.

- Design high-availability gateway setups across multi-region production, non-production, and Operational Technology (OT) zones.
- Architect complex traffic management systems, including advanced throttling, quota enforcement, and distributed caching to handle a peak of 600 TPS.
- Establish advanced zero-trust security standards within Apigee, including OAuth 2.0, mTLS, API keys, and policy-driven data masking.
- Design decoupled logging frameworks to forward gateway metrics via OpenTelemetry to centralized SIEM and monitoring platforms.

Qualifications & Requirements

- **Experience:** 10+ years in Enterprise Integration, with 4+ years acting as a Lead Architect on Google Apigee (X or Hybrid).
- **Migration Domain:** Proven track record of decomposing legacy TIBCO BusinessWorks and API Exchange logic into clean, modern API-led patterns.
- **Technical Stack:** Google Apigee, OpenAPI/Swagger specifications, OAuth/OIDC, CI/CD automation pipelines, and OpenTelemetry standards.
