Job Description - Full Stack Developer / AI

Position: Full Stack Developer – AI Exposure
Location: Onshore, preferably Canada
Timezone: Must be able to work in the EST time zone
Start Date: ASAP

Job Description

We are looking for a Full Stack Developer with hands-on experience in full-stack application development and exposure to AI-powered development tools. The candidate should be comfortable working across frontend and backend technologies, leveraging AI tools to enhance development productivity, and collaborating with distributed teams.

Key Technical Skills and Requirements

- Experience with C# / .NET / ASP.NET Core.
- Frontend development experience with React.
- Experience with JavaScript / TypeScript, HTML, and CSS.
- Experience with REST APIs and web services.
- Experience with SQL Server and relational databases.
- Familiarity with Git and CI/CD practices.
- Experience with cloud technologies such as Azure is preferred.
- Understanding of the software development lifecycle, including testing, debugging, and deployment.
- **Exposure to AI-powered development tools such as Claude Code, including using AI-assisted coding tools to support application development, code generation, debugging, and developer productivity, is an added advantage.**
- Strong problem-solving, communication, and collaboration skills.
- Ability to work effectively with teams across different locations.
- Must be available to work in the EST time zone.

Note: This is primarily a Full Stack Developer role. Hands-on exposure to AI development tools is desirable; prior experience as a dedicated AI Developer or Python expertise is not a mandatory requirement.
